POST-CONSTRUCTION BMPS TRAINING

To Engineers and Developers:

RE: BEST MANAGEMENT PRACTICES TRAINING (SECTION #23)

As referenced in the March 14, 2005, letter regarding the upcoming requirements that all developments in the City of Memphis will be required to submit a plan for “structural and/or non-structural best management practices (BMPs),” I am making you aware of upcoming training opportunities.

We are currently working with vendors of post-construction BMP devices to set up demos and presentations on their products over the next several months to familiarize the engineering and development community with the variety of approaches available. These presentations will be announced once they have been arranged.

Please send contact me at thomas.lawrence@memphistn.gov with your e-mail address, so that I can make you aware when these presentations are scheduled. If you know of someone who would like to present their approach, please let me know. I will also make you aware of other training opportunities as they arise.

Thank you for working with us to ensure that pollution is not discharged into our rivers and creeks along with storm water runoff. If you have any questions about this letter or would like to discuss the implementation of the post-construction BMP requirements, please contact me at 901-576-7122.

Sincerely,

THOMAS B. LAWRENCE, P.E.
